## About The Company

Project Alba is a for-profit social enterprise created in 2012. Our team is aiming to revolutionize support to small-scale farming, bringing dramatic improvements to agriculture and farmers income throughout the world.

The extension services trainer is responsible for coaching our field agents staff and train them to best deliver agricultural techniques know-how to farmers. He reports firstly to our production manager, but also closely collaborate with the R&D manager.

## Job Description:

His responsibilities include :

- Technical training of farmers
  - Manage individual or group trainings of farmers on technical topics (irrigation systems, vegetable production, soil science, pest management, and harvesting methods)
  - Train new farmers on technical skills requested to work for Project Alba
- Assessment of technical level of farmers
  - Assess technical level of farmers on a regular basis based on on farm assessment
- Design tools for farmers
  - Work on relevant documents to leave to farmers to help them in their daily technical tasks
- Reporting
  - Work in collaboration with others members of production team to follow-up technical training of farmers
  - Reports all relevant datas collected on field in relevant systems
  - Reports to Operation manager on technical topics to improve regarding farmers field reality

## Requirement:

The technical advisor requires first a strong formal background in agronomy, plant science, soil science, irrigation systems and pest control in horticulture. Then he needs to have experience in training, a strongly open mind for taking in input from R&D and put it together with field learnings.

### **Education and Experience**

- Master degree in agriculture, horticulture, soil science, pest management
- 3+ years of experience in agriculture is a plus
- Experience in extension services or training for extension services is a strong plus
- Track-record in conducting trainings
- Track record of working with both international researchers and farmers

### **Skills and attitude required**

- Strong openness, working with both international researchers and farmers
- Teacher mindset
- Strong curiosity and willingness to learn in agriculture and behavior change
- Strong leadership
- Good at relationship management, Good team spirit
- Good English and Basic computer skill
